

## Antidepressants, Antipsychotics and Stimulants - Dangerous Drugs on Trial

Filesize: 1.15 MB

### ***Reviews***

*It is one of my personal favorite publications. Indeed, it actually performs, still an amazing and interesting literature. It has been printed in an exceptionally easy way which is merely soon after I finished reading this book where it really altered me, changed the way I believe.*

Soaring Heights Pub. Paperback. Book Condition: New. Perfect Paperback. 356 pages. Dimensions: 10.6in. x 8.9in. x 1.0in. This book exposes a major marketing scheme that is currently under way, and unfortunately our children are the primary targets! The new federally mandated TeenScreen program is nothing more than a deceptive marketing scheme to place as many children as possible (even preschoolers), on one or more highly profitable, although unbelievably dangerous drug. Unfortunately, it has been working! This mandatory mental screening process was deliberately designed to assure that many perfectly normal children would now qualify for one or more of these very profitable drugs. And it's making its way across America through public schools! It all began with the 374 different newly created mental conditions in order to justify placing our children, (including preschoolers), on one or more of the dangerous mind-altering drugs that, although legal, can still be lethal! Only one of the sixteen drugs being promoted for children's use was actually tested on, or approved by the FDA for children's use! With approximately 575 potential side effects associated with Prozac that were listed with the FDA, and over 20,000 law suits settled by the maker Eli Lilly, to date, the question is: Why is Eli Lilly still being allowed to promote Prozac for even pregnant mothers, and very young children? Their tremendous influence with the FDA has to be obvious, and unfortunately places millions of children at extreme risk as a result. That will soon become obvious, once you learn the damning evidence I uncovered, regarding the many serious risks associated with Prozac. The same also applies to the stimulant drugs, such as Ritalin, as well as an additional newer class of drugs known as atypical antipsychotics, which are also being aggressively promoted. It has become an...
