This kind of pdf is every little thing and made me seeking ahead of time plus more. It generally will not price excessive. You will not truly feel monotony at anytime of the time (that's what catalogues are for concerning should you request me).

Skyhorse Publishing. Hardback. Book Condition: new. BRAND NEW, Stella and Steve Travel Through Space!, James Duffett-Smith, Bethany Straker, Did you know that Jupiter is eleven times the size of Earth? The solar system is an incredible place that is still mostly unexplored. So, when Stella and her family move to a new town--where Stella has no friends except for her dog Steve--she goes exploring. In this educational book, travel across the solar system with Stella and Steve as Stella looks for a new home on another planet and imagines what life would be like on another world, from Mercury to Pluto. But along the way Stella learns that Venus has acid rain and Neptune is made mainly of gas, and she begins to wonder whether Earth might actually be the perfect home for her after all. Featuring a fun and informational story from author James Duffett-Smith, and bold, comic book-style illustrations by Bethany Straker, Stella and Steve Travel through Space shows just how great the Earth is (while providing young children with an early science lesson) in a twist on "there's no place like home.".
